GROUPE RENAULT AND NISSAN SIGN EXCLUSIVE ALLIANCE DEAL WITH WAYMO TO EXPLORE DRIVERLESS MOBILITY SERVICES

Groupe Renault and Nissan to become the first automotive manufacturers to explore driverless mobility services with Waymo in France and Japan

Exclusive agreement to initially focus on driverless mobility services for people and goods in France and Japan

Groupe Renault, Nissan Motor Co., and Waymo, leaders in their respective fields, have entered into an exclusive agreement for an initial period to explore all aspects of driverless mobility services for passengers and deliveries in France and Japan.

The agreement is designed to bring together the strengths of each party and expand expertise by assessing market opportunities, working together to research commercial, legal and regulatory issues related to driverless transportation-as-a-service offerings in France and Japan. The Alliance of Renault-Nissan-Mitsubishi, with a global footprint and portfolio covering every segment of passenger and light commercial vehicles, is uniquely suited to join this business exploration with Waymo, a self-driving technology company building the world's most experienced driver with more than 10 million miles on public roads.

The agreement marks a first step to developing long-term, profitable driverless mobility services operations. This analysis will first take place in France and Japan, home to Groupe Renault and Nissan headquarters, respectively, and may expand to other markets, excluding China, in the future.

To further the exploration process, Groupe Renault and Nissan will create joint venture Alliance-focused companies in France and Japan dedicated to driverless mobility services.

John Krafcik, Chief Executive Officer, Waymo

This is an ideal opportunity for Waymo to bring our autonomous technology to a global stage, with an innovative partner. With the Alliance's international reach and scale, our Waymo Driver can deliver transformational mobility solutions to safely serve riders and commercial deliveries in France, Japan, and other countries.

Thierry Bolloré, Chief Executive Officer, Groupe Renault

The story of tomorrow's mobility will be jointly written, with the cooperation of the Alliance with Waymo, as industry leaders, opening new perspectives for driverless mobility services. We believe this partnership will accelerate our commitment to deliver new shared mobility services and benefit the automobile ecosystems by placing us at the forefront of driverless mobility new business streams in our key strategic markets.

Hiroto Saikawa, President and CEO Nissan Motor Co., Ltd.

As we continue our work through the mid-term plan – Nissan M.O.V.E 2022 - to evolve our business to meet changing consumer behavior, Nissan aims to be an early provider of driverless mobility service. Our expertise in the global automotive industry and expertise in strategic partnership will enable us to explore opportunities to grow our portfolio and deliver new value to customers with Waymo, the recognized leader in this space.

1. ABOUT RENAULT-NISSAN-MITSUBISHI:

Groupe Renault, Nissan Motor Company and Mitsubishi Motors represent the world's largest automotive alliance. It is the longest-lasting and most productive cross-cultural partnership in the auto industry. Together, the partners sold more than 10.7 million vehicles in nearly 200 countries in 2018. The member companies are focused on collaboration and maximizing synergies to boost competitiveness. They have strategic collaborations with other automotive groups, including Germany's Daimler and China's Dongfeng. This strategic alliance is the industry leader in zero-emission vehicles and is developing the latest advanced technologies, with plans to offer autonomous drive, connectivity features and mobility services on a wide range of affordable vehicles.
